

Total solar eclipse of 2 August 2027

0, 0 - 0.0000, 0.0000 - Monday, 2 August 2027

This eclipse does not reach these coordinates

On 2 August 2027 the Moon's shadow, and even its partial penumbra, misses this location entirely: there is nothing to see here that day. Your purchase is not wasted: regenerate this document for any coordinates at the download link, for example one of the towns on cyclecalcs.com/eclipses/2027-08-02/, and the full plan appears.
